ALEKON CARGO LOGISTICS HUB

Alekon Cargo OÜ – a logistics hub in the territory of the European Union, provides forwarding services, storage and warehousing services and handling of all types of cargo.

The core business of the Alekon Cargo - storage and warehousing, handling of all types of cargo, loading and discharge services, distribution and forwarding, and preparation and approval of all necessary cover documents in accordance with the requirements of the client.

We offer integrated logistics solutions optimized with the use of our modern warehousing facilities, highly efficient equipment and machinery and skilled personnel.

The custom-tailored approach, extensive experience and responsibility of the team of the professionals in Alekon Cargo ensure proper and prompt performance of the tasks set by the client, in compliance with the highest standards of the industry.

We are at your service seven days a week, without holiday and weekend breaks.

Alekon Cargo is a reliable partner, with whom the safety of your cargo is guaranteed.

Alekon Cargo holds the following certificates:

- Certificate from the Russian Maritime Register of Shipping
- Permission for the storage and transshipment of food products from the Veterinary and Food Board of Estonia
- Membership of the Chamber of Commerce and Industry of Estonia

STORAGE AND WAREHOUSING

To support its activities, Alekon Cargo operates the following infrastructure:

Sheltered warehousing

- Main warehouse with a total area of 9,000 m², complying with all the technological requirements, sheltered, insulated and protected from weather impacts.
- The main warehouse is equipped with 12 metres high shelf stands, facilitating 15,000 standard pallets.
- Second warehouse for packing and consolidation with a total area of 7000m2, equipped with overhead cranes with lifting capacities of up to 16 tons.
- The second warehouse provides storage for 12,000 standard pallets, possibility for storage of large-size equipment.

Open storage

- The customs terminal with an area of 90,000 m² (75% of the area has monolith concrete surfacing, 25% of the area is paved with asphalt) is used for the storage and consolidation of project cargoes.
- The area of the terminal allows to stockpile cargoes from the EU countries as well as shipments in transit from non-EU countries.
- Consolidation, segregation, packaging, and preliminary preparation for the carriage to the final destination.
- The parking yard with an area of 22,000 m² for freight motor transport.
- The container yard with a storage capacity of up to 3,500 TEU.
- Storage of loaded and empty boxes, tank containers and reefer boxes.
- 15,000 m² of the area with a railway spur track in the free trade zone of the Port of Muuga.

Alekon Cargo is licensed as a customs warehouse, a customs terminal and a principal and holds permits for round-the-clock operation and storage of food products and fertilizers.

Alekon Cargo offers:

- Lay-by areas for loaded and empty motor and railway transport.
- Container depot services, including the licensed repair, maintenance, certification, cleaning, painting, marking of different types of containers, washing of tank containers.

CARGO HANDLING

To prepare and dispatch cargoes, Alekon Cargo operates three railway branch tracks with a total front of 1,300 meters in its territory, which allow the loading (discharge) operations of a full block train.

The sheltered railway ramp allows to load 12 railcars simultaneously, significantly reducing the duration of the process.

10 dock shelters are available for the simultaneous loading of motor transport in the warehouse and at the sheltered ramp. In addition, 5 trucks can be loaded at special truck loading ramps under the canopy.

Also, there is a special ramp, where 5 transport units of different kinds can be loaded simultaneously using the following direct modes of cargo transshipment: from a container to a truck, from a container to a railcar, from a railcar to a truck and vice versa.

The loading / discharge operations are continuously video filmed and the video records are available to the client upon request.

The machinery fleet of Alekon Cargo includes:

- a gantry crane with a lifting capacity of 30 tons;
- 45 tons capacity reach stacker for handling containers and equipment;
- 9 lift trucks with up to 16 tons lifting capacity;
- an electric stacker for stacking goods on shelves;
- a special electric lift truck with side grippers for handling tires, paper drums, pulp etc.;
- grippers for the transshipment of drums;
- fork lift trucks with lifting capacities of 1.5 to 4.5 tons for work inside containers.

Cargo securing and packing:

- The loading, securing and registering with the authorities of large-size machinery and other high and heavy cargoes.
- The preparation of cargo securing flow charts and drawings and their approval by the concerned authorities.
- The securing of cargo on railway trains in compliance with the technical regulations or railway securing and latching schemes.
- The packing of cargo for the sea and road carriage.
- The securing of cargo in railcars, trucks and containers.
- The insulation of box cars with food commodities in winter

- Skilled personnel is available for the performance of various operations (cargo transshipment, packing and securing, transportation).

CUSTOMS CLEARING

The customs division offers the full range of required services from declarations filling to obtaining special permits and licenses that the client may need. The department provides the customs clearing of import, export and transit goods.

The following services are offered:

- Preparation and approval of preliminary import declarations, which facilitate faster delivery of the goods across the customs border;
- Services of the principal – providing customs guarantees for transit cargoes;
- Preparation and approval of import / export declarations together with supporting documents;
- Obtaining EUR certificates from the Customs Department, preparation and approval of the CMR, TIR, ATA, T1 and customs documents for transit across EU countries;
- Provision of the customs guarantees and preparation and approval of the documents required for the temporary import/export of cargo;
- Customs warehouse services, customs storage of transit cargo;
- Change of cargo ownership in the customs warehouse (in the free trade zone);
- Arrangement of the sanitary / veterinary vetting and preparation and approval of the respective documents;
- Through our partners, assistance in the arrangement of customs clearing in the territory of the Russian Federation.
